Full Stack Engineer

SUMMARY

Full Stack Engineer with experience delivering enterprise-grade web applications, automating workflows, and building scalable cloud solutions. Skilled in Angular, .NET Core, C#, and SQL Server, with hands-on experience across Azure services, Azure DevOps, and monitoring tools including Dynatrace and Grafana. Most recently supported enterprise modernization efforts blending frontend, backend, and DevOps practices to improve reliability, automation, and data visibility.

TECHNICAL SKILLS

Languages: TypeScript, C# 10-13, JavaScript, SQL

Frameworks: Angular 14-19, .NET 6-10, ASP.NET MVC, Entity Framework Core, RxJS

Cloud and DevOps: Azure (App Services, App Insights, Service Bus, Key Vault, Function Apps, Storage Accounts, Azure SQL, Azure Monitor, Entra ID), Azure DevOps, Dynatrace, Grafana, AWS (familiar)

Databases: SQL Server

Architecture: RESTful APIs, Microservices, Layered Architecture, Clean Architecture

Tools: Git, Docker, RabbitMQ, Jira Administration, CI/CD Pipelines, ServiceNow

Methodologies: Agile / Scrum, System Design, Workflow Automation

PROFESSIONAL EXPERIENCE

Full Stack Engineer | TEKsystems (Client: Alpha Consulting)

February 2025 - March 2026

Supported modernization of a customs brokerage platform handling tax and tariff drawback processing for import/export operations, using Angular 19, .NET 10, and SQL Server.

- Managed Azure App Services supporting test environment deployments, troubleshooting availability issues to keep development infrastructure stable.
- Executed deployments and tracked work through Azure DevOps Pipelines and Boards as part of iterative sprint releases.
- Enhanced API design and data integration, ensuring consistent and reliable communication between services.
- Collaborated with QA and product teams to release stable, tested code across iterative sprints.

Application Administrator - Platform/DevOps Team | H&E Equipment Services

November 2024 - February 2025

- Managed Azure and Azure DevOps infrastructure, executing application deployments and supporting development and release workflows.
- Monitored platform health using Azure Monitor and Application Insights, improving visibility into environment stability.
- Managed access control in Azure Active Directory / Entra ID, assigning roles and configuring RBAC to support application security requirements.
- Served as Jira Administrator, maintaining project structures, workflows, and automations.
- Worked with internal teams to streamline processes and reduce manual operational overhead.

Full Stack Engineer | Veterans United Home Loans

August 2022 - September 2024

- Developed responsive web applications using C#, .NET Core 6-8, and Angular 14-16, including a closing disclosure viewer integrating 3,000+ fields with complex business logic for title company use.
- Extended and maintained 3 RESTful APIs supporting internal tools and client-facing applications.
- Utilized Azure services including App Insights, Service Bus, Function Apps, Storage Accounts, App Services, and Azure SQL across multiple production applications.
- Managed deployments through Azure DevOps CI/CD Pipelines and Releases, including pipeline secrets management and team wikis.
- Collaborated with cross-functional teams through Agile sprints, delivering production features on tight timelines.
- Used GitHub Copilot to accelerate development and code review workflows.

IT Support Technician | Veterans United Home Loans

November 2020 - August 2022

- Wrote Python scripts to automate IT operations and streamline ServiceNow workflows, reducing manual effort on routine tasks.
- Maintained knowledge base articles and improved ticketing criteria in ServiceNow.

EDUCATION

- Full Stack Web Development Certificate -- University of Missouri | 2022
- Google IT Support Professional Certificate -- Coursera | 2020
- A.S. in Instrument Repair -- Minnesota State College, Red Wing | 2015
- B.F.A. in Trombone Performance -- Marshall University | 2011
